EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney of record Ketan Vakil on March 2, 2005.

The application has been amended as follows:

Claim 10, line 5, changed "shaft" to --tube--.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant, label:

Fig. 1: Prior Art.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

2. The following is an examiner's statement of reasons for allowance: The claims are considered patentable because of the inclusion of the claim limitations: "an engagement device, moveably coupled to the attachment device, capable of moving away from the attachment device and attaching to a trailing edge of the turbine blade; a probe, movably coupled to the engagement device, capable of moving along a leading edge of the turbine blade to detect a surface anomaly of the turbine blade" in claim 1; "a blade engager coupled to the distal end of the tube and capable of moveably coupling to a trailing edge of a turbine blade; and a sensor coupled to the blade engager and capable of moving along a leading edge of the turbine blade to detect a

Conclusion
